Curtain Walling

## Our history and facts

In the 1970's two traditional woodworking companies merged to form VHB 'Vereinigte Holzbaubetriebe' - literally translated 'United Wood Construction Companies'.

Today we are offering a wide range of products and services, providing unique solutions for high specification interiors and facade construction.

The heart of the company is the ability to offer consultancy, engineering, production and installation from one location.

With 140 permanent staff, including 30 engineers and technicians, 12 master craftspeople and 55 skilled workers we have completed public and private projects ranging from museums, universities, hospitals, banks, airports, to school gymnasiums and conference centres.

The success of our working methods can be seen in such high profile projects like the Reichstag by Sir Norman Foster, the DG-Bank by Frank O. Gehry or the Nordic Embassies in Berlin, the Conference Centre of the European Council of Ministers and European Court of Justice, each in Luxembourg.

For the future we plan to keep our successful approach of working with and for our clients in developing and producing new ideas.

## Our services:

- **Consultancy:** detailed design and planning for various materials including wood, glass and steel
- **Engineering:** including project management
- **Production:** in our own production units with modern machinery
- **Installation:** on site coordination with own craftspeople, worldwide

## Our product range:

- custom made interiors
- mullion-transom facades
- high security architectural elements, e.g. bullet proof windows
- shock-absorbing systems for gymnasium walls and floors

## Our sales volume:

2019: ~28.5 Mio. Euro

2018: ~22.7 Mio. Euro

2017: ~18.5 Mio. Euro

## Current Projects

### Interiors

Agentur für Arbeit Bremen  
Justus Liebig Universität Gießen  
Jüdisches Museum Frankfurt  
Pergamonmuseum Berlin  
Städtisches Klinikum Karlsruhe  
Klinik Hochstaufen Bayerisch Gmain
